

## **Northern Arizona Shooting Range**

- **Forest Service Coordination** - The Department received copies of the Coconino National Forest's (CNF) completed Feasibility Report and draft Agreement to Initiate (ATI), with other related documents, for the proposed Willard Springs Land exchange. The ATI allows the two parties to outline the framework for the land exchange and provides clearance to initiate the NEPA process. These documents have been submitted to the Regional Forester for review and decision. CNF recommends that the Department coordinate to finalize the ATI while awaiting the Regional Forester's decision. Cost estimates for the draft ATI will need to be reviewed and approved by the Department. Once funding is approved, the Lands Program and Assistant Attorney Generals will review and draft the ATI language.
